

PRESS RELEASE

CONGRATULATIONS TO FAST GENETICS' SCHOLARSHIP WINNERS

Saskatoon, Saskatchewan (August 23, 2017) – Congratulations to Fast Genetics' Innovators and Future Leaders in Agriculture Scholarship winners Marianne Sytnyk (left) and Sarah Heppner (right).

In September, Marianne will resume her studies as a third-year Animal Science major at the University of Saskatchewan's College of Agriculture and Bioresources. Sarah will also resume her studies as a fourth-year Nutrition major at the University of Saskatchewan's College of Agriculture and Bioresources. Both winners have strong involvement in their communities and university groups and will be assets to the agriculture industry when they launch their careers.

About The Innovators and Future Leaders in Agriculture Scholarship

Fast Genetics' Innovators and Future Leaders in Agriculture Scholarship is valued at up to \$5,000 and given to post-secondary students studying Animal Science and demonstrating leadership, innovation, strong academic abilities, and a long-term fit with Fast Genetics.

About Fast Genetics

Fast Genetics is a leading North American pig genetics company with global reach. We provide breeding stock and innovative solutions to pork producers. We are known around the world for our high-health and world-class performing breeding stock. We are pioneering sex sorted sperm in the swine industry, genotyping all animals raised in the nucleus, and developing other novel reproductive technologies.
