

## Swine Reproduction Leader

Fast Genetics is seeking a talented and motivated person with experience in swine reproduction. This new position will be responsible for implementing a sexed sorted laparoscopic and low dose AI breeding program at Fast Genetics' Q-barn located in Spiritwood, SK. The candidate will also be required to assist, train and supervise sow breeding and management crews with a special interest in low dose LAI.

This position will include the following responsibilities and day-to-day functions but is not limited to:

- Implement protocols and manage breeding females for laparoscopic AI.
- Perform laparoscopic AI.
- Communicate (verbally and written) research related projects.
- Manage personnel and make decisions in a fast pace environment.
- Provide daily leadership and manage personnel in timely fashion.
- Demonstrate high level of professionalism and confidentiality with company related matters.
- Complete data entry and record keeping.
- Maintain communication between research team, sorting lab and production manager.
- Perform transrectal ultrasounds for characterization of ovarian status.

The successful candidate would ideally possess the following qualifications and experiences:

- BS in Biology/Animal Science or DVM preferred.
- Strong background in male or female swine reproduction.
- Experience in artificial insemination and estrus synchronization.
- Experience and knowledge in swine bio-security.
- Experience with Microsoft office (Word, Excel, PowerPoint)
- Attentiveness to detail.
- Capable of working as a member of a high performing team.
- Verbal and written communication skills.
- Experience with ultrasound for pregnancy in swine.
- High animal welfare skills.
- Time management skills.

Salary will be based on the successful candidate's experience and qualifications.
