

Swine Reproductive Specialist

About Us

Fast Genetics is a leading North American-based pig genetics company with a global reach. We provide breeding stock and innovative genetic solutions to pork producers to assist them in providing healthier food and using fewer resources in an environmentally sustainable way.

Opportunity

Fast Genetics is currently seeking a highly motivated person to fill a **permanent full-time** position as a **Swine Reproductive Specialist** in Middleton, WI. This new position will be focused on research projects with sexed sorted sperm that will be leveraged between lab (Andrology and Semen Sorting Lab) and farm (commercial farms and University of Wisconsin swine farm). The candidate will also be required to travel within the US and Canada implementing projects related to sexed sorted sperm to oversee the application of sexed sorted semen in the commercial swine industry.

This position will include the following responsibilities and day-to-day functions, but is not limited to:

- Use reproductive expertise to implement and supervise lab and field trials.
- Ability to communicate (verbally and written) research-related projects to customers.
- Ability to manage personnel and make decisions in a fast-paced changing environment.
- Demonstrate a high level of professionalism and confidentiality with company-related matters.
- Responsible for technical procedures such as data entry and record-keeping
- Willingness to travel.
- Maintain communication between the research team and field breeding crews.
- Capable of working as a member of a high-performing team.

The successful candidate would ideally possess the following experience and qualifications:

- MS in Biology/Animal Science preferred.
- Strong background in male or female swine reproduction.
- Five years' experience in swine commercial production and general swine husbandry preferred.
- Experience in applied research, artificial insemination, ovulation synchronization, and freezing semen
- Experience and knowledge in swine industry biosecurity.
- Experience with Microsoft Office (Word, Excel, PowerPoint).
- Experience with statistics, data analysis, and thorough documentation of work.
- Attentiveness to detail.
- Verbal and written communication skills.
- Ability to analyze and interpret data.
- Experience with ultrasound for recognition of ovulation and pregnancy.
- Interest and concern for animals.
- The successful candidate must be eligible to travel outside of the US and Canada as travel may be required.

What we offer

- Dynamic, challenging work for talented individuals.
- A competitive salary.
- Comprehensive benefits package including a 401K.
- Inclusive work environment.
- Wages will be based on the successful candidate's experience and qualifications.
